

Guidelines for electronic manuscript submission

The *Canadian Journal of Veterinary Research (CJVR)* uses an online electronic manuscript submission system (ScholarOne). Please use the website <http://www.canadianveterinarians.net/publications/cjvr-submit-manuscript.aspx> to submit articles. If you encounter any difficulties, please contact the CVMA Journals Department at 613-236-1162, ext. 117. Other correspondence should be directed to:

Managing Editor

Canadian Journal of Veterinary Research

339 Booth Street

Ottawa, Ontario K1R 7K1

Canada

Telephone: 613-236-1162, ext. 124

Fax: 613-236-9681

E-mail: hbroughton@cvma-acmv.org

Steps 1–4 — (1) Type, title, abstract; (2) attributes; (3) authors and institutions; (4) reviewers

Enter the manuscript type, title, abstract, author(s) details, keywords (optional), and 3 suggested unbiased and expert reviewers (the editor retains the right of final selection).

Step 5 — Details and comments

A) Include a cover letter that contains author(s) contact information and states that the manuscript has been seen and approved by all authors.

B) Complete required questions.

Step 6 — File upload

Upload manuscript, tables (MS Word), figures (JPEG or TIFF format), and copyright forms. Copyright forms are available from the "Instructions and Forms" link at the top of the bar in ScholarOne. Copyright forms may be scanned and uploaded with your other files at the time of submission, or faxed or mailed to the CVMA office at the time of acceptance.

Step 7 — Review and submit

Review each section, review the PDF, then submit.

Note: For more detailed information on submitting your manuscript to ScholarOne, click on "Help" at the top right of your screen and go to the "Author" section.

Manuscript requirements

Manuscripts must be double-spaced, paginated, written in 12-point font with 1" margins and must include line numbering. Save the manuscript in a recent version of Microsoft Word. Save tables and figures as separate files. Remember to make note of the manuscript number.

The *CJVR* welcomes manuscripts in English or French. Articles must be as concise as possible. Criteria for acceptance of articles include both quality of the research and relevance to our readers. All manuscripts submitted to the *CJVR* will be subjected to a check for plagiarism. Find tips from the Editor of *The CVJ* on submitting peer reviewed articles here: www.canadianveterinarians.net/documents/submission-tips-from-the-cvj-editor

Authors are invited to submit the names and e-mail contacts of 3 reviewers. In order to be invited to review, suggested reviewers must be individuals who have published in the subject area and/or have specific expertise on the subject, and have no conflict of interest (not a member of your university, not someone with whom you have published or collaborated in the past 5 years).

Manuscripts can be made generally available through the author's institution after an embargo period of 3 months following publication.

Authors will be charged **\$95 CAD per published page for CVMA Members and active subscribers** and **\$140 CAD per published page for Non-members**, \$25 CAD per table, \$25 CAD per black-and-white figure or image, and \$155 CAD per color figure or image. Payment particulars are due at the acceptance stage; you will be charged after publication.

Note: If your manuscript contains color figures or images, you will **automatically** incur a fee of **\$155 CAD** per color figure or image. All light microscopic images must be submitted and published in color. These conditions are necessary for acceptance of your article. Significant changes in the PDF stage will result in additional charges, at the discretion of the Assistant Managing Editor.

Review articles

Reviews should be no longer than 30 pages of text (including an abstract of 250 words maximum and 60 references maximum) plus 8 figures and tables combined.

Short communications

Short communications should be no longer than 10 pages of text (including an abstract of 150 words maximum and 20 references maximum) plus 4 figures and tables combined. The format of a short communication should contain all of the sections itemized under Full articles, without the headings.

Full articles

The text of full articles should be no longer than 3000 words maximum (NOT including the title page, an abstract of 250 words maximum, figure legends and 40 references maximum) plus 8 figures and tables combined.

Title page

The title page should contain the title of the article (informative but concise); the name and address (e.g., department and institution) of

each author; disclaimers, if any; and the name, full postal address, telephone and fax numbers, and e-mail address of the corresponding author(s). Please include no more than 5 key words.

Abstract

In 1 paragraph, state the purpose of the study and summarize the main methods, findings, and conclusions. If you are able to provide a French translation of the abstract, it would be much appreciated.

Introduction

Clearly state the purpose and summarize the rationale for the study or observation. Cite only strictly pertinent references, and do not review the subject extensively.

Materials and methods

Describe the methods and materials used in enough detail that the research could be repeated. Identify chemicals, equipment, and pharmaceuticals, placing the manufacturer's name and address in parenthesis; with pharmaceuticals, place the trade name in parenthesis and use the generic name thereafter. Experiments on animals must follow the *Guide to the Care and Use of Experimental Animals* (Canadian Council on Animal Care, 315–350 Albert Street, Ottawa, Ontario K1R 1B1) and must be approved by the animal care committee of the authors' institutions or follow the institutional guidelines.

Results

Present findings in a logical sequence in the text, tables, and figures. Do not repeat tabulated data in the text.

Discussion

Do not repeat the results. Discuss the findings, their limitations, and your conclusions in relation to the literature.

Acknowledgments

Acknowledge only persons who have made substantial contributions to the study but do not qualify for authorship, as well as sources of support (e.g., grants, equipment, or drugs). Do not include recognition of editorial or secretarial assistance.

References

Number references in the order of first mention in the text, using Arabic numerals in parenthesis. Abbreviate journal titles according to the style of *Index Medicus*. Avoid using abstracts. Do not use unpublished data or personal communications as references; if they are essential, insert them in parenthesis in the text, including the source's full name and institution, as well as year of acquisition.

Examples for references

Journal article

Huang YT, Teng LJ, Ho SW, Hsueh PR. *Streptococcus suis* infection. *J Microbiol Immunol Infect* 2005;38:306–313.

Book

Fisher RA. *Statistical Methods for Research Workers*. 14th ed. New York, New York: Hafner, 1970:99–101.

Chapter of a book

Weinstein L, Swartz MN. Pathogenic properties of invading microorganisms. In: Sodeman WA Jr, Sodeman WA, eds. *Pathologic Physiology: Mechanisms of Disease*. Philadelphia, Pennsylvania: WB Saunders, 1974:457–472.

Dissertation or thesis

Tessaro SV. A Description and Epizootiologic Study of Brucellosis and Tuberculosis in Bison in Northern Canada [PhD dissertation]. Saskatoon, Saskatchewan: University of Saskatchewan, 1988:191–192.

Published conference proceedings

LeCouteur RA, Kornegay JN, Higgins RJ. Late onset progressive cerebellar degeneration of Brittany spaniel dogs. *Proc Annu Meet Coll Vet Intern Med* 1988:657–658.

Tables

Use the computer's "Tables" function; do not use "tabs." Designate footnotes by superscript letters ^(abc). Tables must be submitted as a separate file and be a recent version of MS Word. Consult previous issues of the *CJVR* for examples.

Figures

Figures should be produced and uploaded as separate electronic files. Hand drawn figures/tables are not acceptable. Lines must be thicker than "hairline" (at least 0.03-cm wide) to reproduce clearly. Symbols, arrows, or letters on photomicrographs should contrast well with the background; include an appropriate scale and bar (measure) on each figure. Titles and explanations should be included as a figure legend after the References. Figures must have a resolution of at least 300 dots per inch and be in JPEG or TIFF format. Figure width must be 3.5 inches for one column, or 7.5 inches for two columns. Please note that all photomicrographs/light microscopic images must be submitted and published in color. Do not download figures from the Internet, as they do not have sufficient resolution. Charts, graphs, and line drawings often require minor style changes and, therefore, should be in an editable format. Identify the stains used and cite each figure in the text in consecutive order.

Authors are encouraged to refer to published issues of the *CJVR* on the CVMA website (www.canadianveterinarians.net) for questions on format.
