Join Dr. Meg Sleeper for a day devoted to dog and cat cardiology.

Session 1: ABCs of ECGs
Following a brief review of cardiac electrical physiology and ECG interpretation, common ECGs in small animal patients will be presented in a case-based format. For each case, recommendations for diagnostics and/or appropriate therapy will also be discussed.

Session 2: Update on Treating Canine Valve Disease and Heart Failure
This session will focus on the current recommendations for medical management and monitoring of dogs with degenerative valve disease, particularly focusing on treatment of dogs with degenerative valve disease and congestive heart failure.

Tips and Tricks For Treating Heart Failure Patients
This session will focus on at home monitoring techniques and medication tricks to optimize outcomes in refractory heart failure cases.

Session 3: Your Pet Has A Murmur?
Following a discussion of important factors to consider in dogs and cats with newly ausculted murmurs, a series of cases will be presented to highlight different approaches to choosing the various diagnostics that are available.

Session 4: Update on Managing Feline Heart Disease
This session will cover a brief description of the common forms of feline cardiomyopathy and how to differentiate them. We will also discuss potential therapies based on the current scientific evidence.
