WEST NILE VIRUS FOUND IN TWO HORSES

Two horses in the Cache Creek area have shown clinical signs of West Nile virus infection. Blood tests on both horses show high levels of antibody against the virus indicating active infection.

A news release was sent to media throughout the province. If you wish to read this news release, please visit the CVMA-SBCV Chapter website and click on NEWS in the right-hand column. If you or your colleagues have any questions, please contact Dr. John Twidale Chair, Equine Committee, CVMA-Society of BC Veterinarians Chapter, by phone (604.930.8090) or by email (horsedoctor@telus.net).
