DENTAL SEMINAR RADIOGRAPHIC INTERPRETATION AND POSITIONING FOR VETERINARIANS AND TECHNICIANS
AUGUST 24th 2019

PRESENTED BY KEVIN STEPANIUK AT DEAN PARK PET HOSPITAL IN VICTORIA BC

Kevin S. Stepaniuk
DVM, Fellow of the Academy of Veterinary Dentistry
Diplomate, American Veterinary Dental College

Course Description: Intraoral radiology is necessary, and required, to accurately diagnose and provide appropriate treatment recommendations for canine and feline dentistry. The course is designed to introduce, improve, and enhance intraoral radiology positioning, acquisition, and interpretation in the canine and feline patient. Understanding the normal and abnormal opacities and lucencies will help guide the veterinary medical team to provide increased patient care and client service. Participants will learn normal and abnormal roentgen signs of oral and dental pathology by working through the presented curriculum and actively challenging themselves in assessing the image loaded lecture workshop.

Course Date and Location:
August 24th, 2019
McTavish Academy of Arts (next to Dean Park Pet Hospital)
1720 McTavish Rd, North Saanich, B.C.
